

Card Payment Technology

As a laundry room technology leader, WASH outfits many of our laundry rooms with electronic card systems to eliminate the need for residents to use coins in machines. These coinless and cashless card systems are not only convenient for residents, they deter break-ins and reduce vandalism.

WASH offers a variety of safe and secure card payment options:

- Our wireless payment system allows residents to simply swipe a debit or credit card to pay at the washing machine or dryer.
- With a laundry payment card, residents can use an Add-Value Station right in the laundry room, or go online to add more value using their credit card or bank ATM debit card.

WASH is committed to being an industry leader and delivering the best possible solutions to our partners.
